Education

University School of Information Communication and Technology, GGSIPU (Bachelor of Technology)

8.77 CGPA - (2022–2026)

Software Development | Machine Learning Engineer

Experience

Outlier AI | LLM Engineer

Nov'25 – Feb'26

- Designed a multi-library reasoning evaluation framework for LLMs to test dependency-based, multi-hop reasoning instead of isolated retrieval.
- Tasks enforced sequential dependencies, defined a single verifiable **GTEA**, a Golden Trajectory for ideal reasoning, and exposed **SOTA** failure modes, enabling reliable differentiation.

IBM | Data Analyst Intern

Jun'24 – Aug'24

- Developed a client-facing Analyzer using Plotly Express, handling **3,000 concurrent users** and visualizing **10K+** global data points.
- Automated processing with Python, **reducing analysis time by 30%**. **Collaborated with 5+ team members** to deliver actionable insights for trend reporting.

IIT Delhi | Research Intern

Feb'24 – Aug'24

- Engineered IoT sensor optimization algorithms for real-time industrial data pipelines, adopted by major manufacturing firms.
- Led a **17+ member team** to extract actionable insights, enhancing efficiency by 15%.

Projects

Virtual Reality-Based Training for CBRN Disaster (SIH SHORTLISTED)

[VRRescue](#)

- Tech Stack: ReactJS, Django, Flutter, MariaDB, Tailwind CSS, Unreal Engine*
- Developed a VR disaster response simulation with **5,000+ projected users**, integrating web and mobile dashboards to deliver immersive, data-driven training for emergency personnel.

Climate Analysis Monitoring Panel

[Dhruvayu](#)

- Tech Stack: Python, Jupyter, Scikit-Learn, Plotly, Excel*
- Built a monitoring tool visualizing **15,000+** global climate data points from Kaggle to track key metrics and regional trends.

AI-Powered Eye for Smarter Cities

[UrbanEye](#)

- Tech Stack: Python, OpenCV, Pytorch, Streamlit, DeepSort*
- An AI-powered a real-time CCTV-based system that optimized signal timing using YOLOv8 & DeepSORT, **reducing congestion by up to 30% in test simulations** and **cutting average wait times by 25%**.

Technical Skills

Languages: C++, Python, JavaScript, RAG

Frameworks: React.js, Node.js, Tensorflow, Voiceflow, OpenCV, Pytorch, Machine Learning Frameworks.

Developer Tools: VS Code, Power BI, Microsoft Excel (VBA), Gen-AI, Agentic AI, Agile Methodologies

Certifications

- IBM RAG and Agentic AI** designed multi-agent architectures using LangGraph and LangChain.
- IBM AI Enterprise Workflow V1 Data Science Specialist** bridged business priorities and tech execution.
- GOOGLE Cybersecurity Professional Certificate** proficient Python, Linux, SQL, SIEM Tools, IDS Systems.
- McKINSEY Forward Program** Completed 5 corporate modules on AI and various problem-solving techniques.

Case Competitions & Technical Contests

- AMAZON MACHINE LEARNING CHALLENGE: Ranked among the **top 50** out of 7,000+ participants.
- TRBS'24 (IIM AHMEDABAD): (**Finalist amongst 1200+ teams**) pitched SAMARTH, an XR-enabled autism support platform with LMS and personalized therapy tracking.
- PITCH PERFECT (FMS DELHI): Conceptualized and pitched a centralized e-marketplace model for legal and compliance professionals.
- C2P SOCIAL ENTREPRENEURSHIP SUMMIT (SRCC): Advanced Meta verse to train NDRF personnel using *Immersive experience* with dashboard as a one stop solution to all CBRN disaster response activities.

Positions of Responsibilities

- USICT ALUMNI COMMITTEE, LEAD: Managed a team of 30+ members and fostered alumni-student relations.
- USICT PLACEMENT CELL, BATCH COORDINATOR: Drove a measurable increase in campus recruitment by expanding company outreach.
